PROJECT DESCRIPTION

ASK Romein built:

- A concrete underground car park (-1)
- A shopping mall with concrete structure (0 and +1)
- An upper floor with steel roof beams

Our engineers devised a complete Design & Build based on the customer's rough indications. This building's specific features are its curved wall panels, which form an attractive accentuation in the sleek overall design.

Surface:

Stores = 13,600m²

Parking garage = 11,000m²

Description: Foundation with 594 screw piles
Precast concrete columns and beams 23,950m²
prestressed slabs
